### Illuminating Pennsylvania Avenue.

It is sincerely to be hoped that the project of the District Commissioners to the White House to the Capitol will soon be carried into effect. Some two months ago The Washington Herald editorially commented upon the lack-luster appearance of this thoroughfare and suggested that smaller municipalities like Norfolk had experienced the advantages of brillighting their principal streets New York's Great White Way is the best advertisement of that city, and Washington's Pennsylvania avenue, when it is resplendent with a multitude of lamps, will be a most attractive feature of the National Capital

There will be some regret in many minds that the illumination is to be securred at the sacrifice of the broad and uninterrupted picture which the Avenue The splendid sweep of even though these be of a decorative naire, they will take away from the present impressiveness of the wide street In addition to this, the isles of safety will detract from the value of the Avenue when parades are in progress They will also necessitate some rearrangement of inaugural processions, inasmuch as the thousands who participate in that event are only able to march over the route before dark by spreading their inauguration occurs only once in four years, and the illumination is to be a nightly affair.

The Commussioners, in their desire to make an impression upon the casual visitor to the National Capital, should not forget the citizens who pay taxes here all the year around. The minor streets and the main-traveled roads should not be left in darkness in order that a display may be made in one or two localities. A proper system of lighting will include both a brilliant showing on Pennsylvania avenue and an adequate amount of light in less favored sections terialism

Gov. Wilson has been advised by the of his State that, according to the New Jersey law, he has the right to use free railroad passes. The governor is satisfied with the opinion.

## Cabinet Officers on the Floor.

The experiment of appointing the commutees of the House through a committee rather than by the Speaker seems thus far to have been successful. It has certainly removed complaint concerning ocratic power of the Speaker. Instances have been numerous enough in the past when Speakers deliberately with their own personal views, regardless of public sentiment. This personal equation has been removed.

There is one other experiment which might well be undertaken. In Great Britain the members of the cabinet have seats upon the floor of the House of Commons and are subject to questions at all times. Occasionally some of the most important messages of the government to the people are communicated in this fashion, while, if the cabinet officer refrains from a categorical reply upon the ground that such answer would not be for the best interests of the country, his attitude is respected. The system has prevailed in Great Britain most successfully, and there is no reason why it should not be tried in this democracy. As it is now, all inquiries to the heads of departments are addressed in writing, and the subject matter is generally forgotten long before the reply is youthsafed. When appropriation bills are under consideration the presence of the Cabinet officer under whose direction the money is to be expended would be a valuable aid to intelligent action. At present the information concerning the various items of this searce of year to do the medium of other members, who simply repeat what they have been told. Very should not be tried in this democracy. frequently the data is inaccurately stated, them, having in mind especially the so- attend the commencement and even more frequently the query is called money trust in New York. ### Opening of the Baseball Season.

Yesterday throughout the United States hundreds of thousands of men, women, and children forsook their ordinary avocations and spent the afternoon watching the opposing baseball teams contest for victory.

The demonstration was a great tribute to a manly sport. Baseball has taken a firm hold upon the American people as the national game, and its popularity is due not alone to its interest as a spectacle, but because it has been kept free from objectionable features. It is to the credit of the managers of the game that no serious scandal has ever been connected with the struggle for the pennant, and the public accepts the efforts of the players as be ing an honest endeavor to win. As long as baseball can thus be maintained upon popular esteem. When jockeying or trades in the matter of winning or losing games are introduced, the doom of the game will be sealed.

We are a busy people, taken all in all, with comparatively few holidays, and slaves to business to an extent unknown in any other country. It is worth while luminate Pennsylvania avenue from to have a game which will attract the merchant or the professional man into the open air for an afternoon's recreation All work and no play makes Jack a dull

### Dr. Wiley and the Easter Egg.

There is great apprehension among the children of Washington because Dr Wiley, the pure food expert of the Ag ricultural Denartment, has decided against the highly colored Easter egg. Egg rolling on the White House lawn i an annual event to which youthful Washington looks forward with joy, and no wonder that the little ones are involving a speed of about 165 miles an mbroken asphalt from curb to curb is and no wonder that the little ones are to give way to a series of lamp-posts, and fearful lest this time-honored custom be abolished

There need be no fear on this score if we understand aright Dr. Wiley's edict. He is merely urging a proper dis crimination. He is not opposed to Easter eggs of all sorts and conditions. He warns children and their parents against colors produced by the use of poisonous coal-tar dyes, and he urges the adoption of a law in this country similar to the one operative in Germany ranks from curb to curb, However, an preventing the use of any but the mos harmless colorings in making the Easter egg attractive to invenile eyes. In this he is absolutely right, and sensible mothers will co-operate with him.

The use of eggs for the spring festical is an ancient custom. They were adopted as a symbol of the resurrection by the early Christian church, just as spring is allegorically a symbol of the reawakening of the earth after grim, death-dealing winter. Egg rolling rep resents a picturesque custom, a venerable survival. It is one of the few survivals of a legendary past in this age of ma-

## Will We Minimize Mine Horrors?

It is estimated that on an average 2,000 persons are killed and some 8,000 mjured each year in the coal mines of no long last night?" this country. It is also held that a very arge percentage of those casualties is due to imperfect equipment or to negligence and indifference. There is no lack of knowledge as to what ought to be done to avert accidents, and there is enough legislation. What is needed is a thorough application of law and knowledge and the strict enforcement of the former. The lesson of the fatal mine conflagration near Scranton and of the still more awful disaster in Alabama will be wasted unless we realize the disgrace to our civilization of the repeti tion of these catastrophes, and unless it eads to the perfection of devices for the

reduction of risks taken by miners. The Federal mine rescue corps did excellent work in both instances, although unfortunately its endeavors had to be confined to the recovery of bodies of the victims. This cannot be taken as being the fault of the Mine Rescue Bureau, for its efforts are directed to the prevention of accidents and to the probing of causes, as well as to heroic rescue work. The occurrences of last week have demonstrated the value of these

that, where a year ago there was a classification of the great financial interests into three groups, now there exists but one group, and it is implied that it relates to control of banking operations.

We know that these operations are carried on upon a large scale, just like many other affairs. How Congress or the Attorney General can do something to stop them is not quite clear, as there is no violation of any law. Banking is an agency for carrying on all manner of enterprise in which credit is largely employed, requiring a transfer or exchange of values and settlement of accounts. If it has become concentrated in New York, it is because railroads mining, and industrial corporations. whose business extends over this country and even reaches to foreign countries, have their headquarters in that city Hence, as long as the need for the use of banking capital is centered there, the capital and the facilities for handling it will naturally concentrate there also.

for there are too many centers of greater a high plane it will continue to grow in or less financial power throughout the country. There is nothing so difficult to monopolize as credit and the means of transferring it.

## HELPING IRISH PEASANTS.

At the forty-second sale of the Roya Irish Industries Association at Lans downe House, London, Hibernian peer owne House, London, Hibernian sses assumed the role of shopkee and were successful in disposing of im mense quantities of goods. Much of the work on sale has been done by nts, and some of it by dis-Altogether. the association was started a \$327,150 has been realized by the va-rious sales, and the great bulk of it has found its way into the pockets of some of the poorest among the Irish

peasantry. The Duchess of Connaught Princess Patricia were received by Lord Arthur Hill, Lady Lansdowne, and Lady Londonderry. There was no formal ceremony, and the royal visitors pro-ceeded at once to an inspection of the stalls, at which they made numerous ses, some of which were intended sents for the duchess' grandchil

gler for the limelight never sat in the Senate. While simply insuppressible, his manner of speech and arguments were of a striking nature, which compelled the dignified leaders of the Senate to take notice. He was a unique figure in that body, without any predecessor or contemporary like him—and to be perfectly frank, the country will make no mistake if it shall never produce his duplicate in that body. One specimen was interesting, immensely so, but a second would pall on the taste.

We say these things because Senator Tillman is unable to attend the extra session, and it is doubtful if Washings to mill ever see him or his like again. A year or two ago he was stricken with illness, and since then this redoubtable all adiator of the arena has been steadily losing the spiendid plenitude of mental as with dramatic effect for so many years.

Verily, it is not too much to say that the nation would rejoice to see Ben Tillier.

### A CIRCULAR LETTER.

Started 23 Years Ago and Kept From the Boston Transcript.

The days of the circular letter corre-

spondence, which prevailed during our fathers' time, are probably over now, except in a few isolated cases. We have just heard of a circular letter which started twenty-three years ago with ten members. Four of them dropped out very nembers. Four of them dropped out very soon, but six of them have continued ever since without a break, until a few days ago, when one of the number died. These six women have kept this letter going all this time without any real in-terruption. The circuit of the letter took about two months, and it followed the members about from one post-office to mother as they changed their addresses fort and information. Each of these wo men has kept pretty well informed about the personal affairs of the others. Yet,

day he complained by saying: 'I'm tired for coronation veils, and also for loved by the people of the North-out for playing second fiddle.'

"The trouble with you is that you are full variety chosen was generally confused by the people of the North-out for count wear on May 5 and 9. The beauti-which told terribly on my nerves-when full variety chosen was generally confused as expect that they and their friends are to regard sleep and fatigue.
